We Are Here:

Why and How We Control the Future of Infant Nutrition in the Central Valley Christine Staricka, BS, IBCLC, RLC, Childbirth Educator

Learning Objectives

Identify 3 ways in which our population is unique within the broader California state population

Describe 3 proposed strategies that can be used to extend the duration of breastfeeding and human milk feeding in the Central Valley population

Long-Term Goal: Improve Infant & Toddler Health through Nutrition

Positive lifetime health outcomes accumulate through appropriate nutrition from birth

Appropriate nutrition for infants & toddlers facilitates optimal growth and development

Long-Term Goal: Reduce Health Disparities Valley-Wide

Healthier babies & toddlers mean healthier families through reduced spread of communicable diseases in families & the community and reduced risk of chronic disease

Healthier people enrich a community in many ways, including making it more desirable as a place to live for future generations

Central Valley =

- large geographic area
- many Very Rural communities
- large proportion of community living below federal poverty line
- high rates of infectious AND non-communicable diseases
- high preterm birth rate
- lower breastfeeding rates

Needs of families have evolved – emerging signs point to modernizing and consistently implementing a multi-pronged, targeted strategy for increasing the number of Central Valley-born infants who are breastfed and for how long

Initiatives (i.e. Baby Friendly Hospital Initiative) are not being applied in an equitable way, leaving many families behind and resulting in disproportionate effects on health and quality of life Information, evidence, research, science of human lactation and how to best support it are established – time to act

Proposal: Central Valley Infant Nutrition Team

Broad coalition of committed individuals from across the Central Valley who work to secure an optimized, equitable environment of health for all residents through evidence-informed infant nutrition support which is free of commercial influence and based on the science of human nutrition

Composed of Action Groups, each with a Vision

Donor Milk

Vision: Every baby born in the Central Valley has access to Pasteurized Donor Human Milk

Hospitals

Vision: Every baby born in the Central Valley is born in a Baby-Friendly designated or equivalent hospital/birth facility

Community Care

Vision: Every family can easily access affordable or free high-quality lactation care in the community through WIC, trusted peer support such as La Leche League or Baby Café USA, outpatient clinics, pediatric offices, and private practice lactation care providers

Professional Development

Vision: Every health care provider in the Central Valley has foundational training in basic lactation management and participates in ongoing continuing education in the science and practice or human lactation

Worksites, Schools, & Child Care Settings

Vision: Every worksite, school, and childcare setting (formal & informal) provides appropriate accommodation for and care of lactating people and their children

Messaging & Marketing

Vision: Every resident of the Central Valley is regularly exposed to consistent and relevant messaging about the importance of human lactation and human milk as nutrition

Emergency Preparedness

Vision: All counties in the Central Valley have evidence-informed public health policies and protocols supporting the nutritional needs of families of infants & young children during emergencies and natural disasters

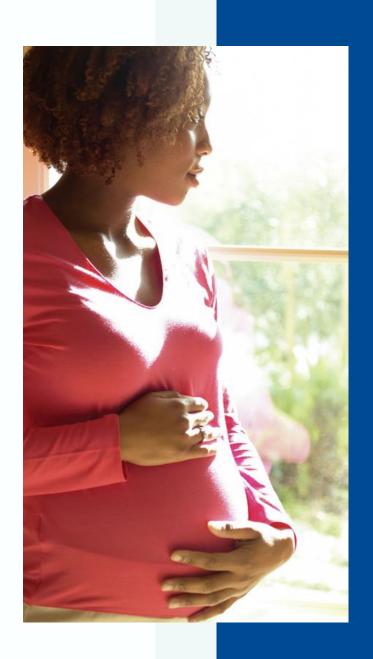

Quick Reaction Team

Vision: Any time-sensitive or unique need or event (i.e. a global pandemic) which impacts infant nutrition in the Central Valley can be addressed by a group of individuals trained to provide rapid response, information, and action

Bold? Of course it is. Possible? Absolutely.

Anthem Doula Pilot

Program Description

Are you **pregnant?**

Anthem's doula program can help support you!

www.anthem.com/ca/medi-cal

To address health disparities in preterm births, Anthem has created a Doula pilot in Fresno County in collaboration with March of Dimes, Black Infant Health and Dutchess of Doula.

The Doula Pilot is available in Fresno County and Kings County for Anthem Blue Cross Medi-Cal members and covers the following:

- Up to 6 prenatal visits
- Full labor and delivery support
- Up to 3 postpartum visits
- Childbirth education classes

*COVID-19 Update: all services are held virtually

What is a Doula?

A Doula is a non-medical professional that assists in the prenatal, labor and postpartum support.

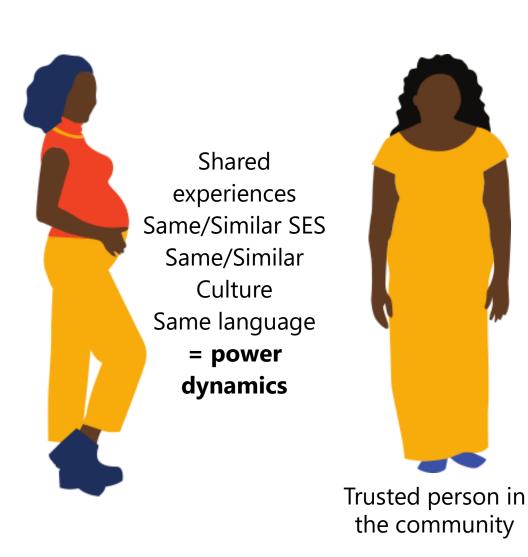

Historically, this has been done as "servant" role, however, recently, doulas have been recognized as a valuable component in pregnancy care.

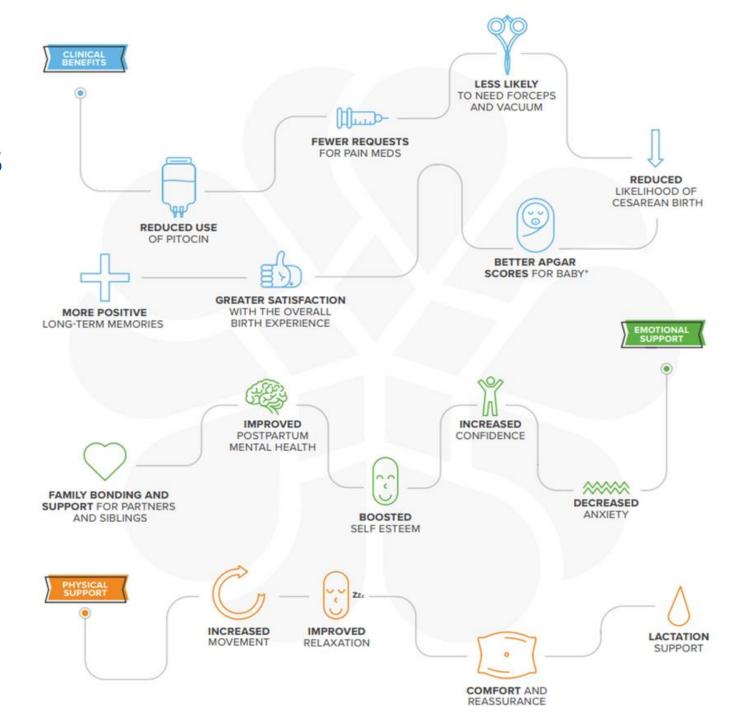

What is a Doula?

emotional support

Benefits of a Doula

Local Collaborators

Empowering Pregnant and Mothering African American Women

Observations to Date

Out of 11 births: 3 C-Sections 8 Vaginal Births

Births occurring at 35-41 weeks (38.6 week average)

10 referrals to CA Special Programs; 7 COVID Meals 3 Housing Referrals

What is a WIC Regional Breastfeeding Liaison?

Breastfeeding Ambassador for California WIC

Breastfeeding is the norm for WIC mothers and their infants up to age of one year and beyond; and

WIC is known in the community as a source for breastfeeding assistance and information.

Regional Breastfeeding Liaisons in the Community

- Health Care Providers
- Hospitals
- Community Building and Coalitions
- Lactation Accommodation

Cultivating Breastfeeding in Fresno & Madera Counties: Adventist Health Reedley

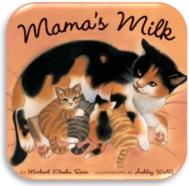

Cultivating Breastfeeding in Fresno & Madera Counties: Books, Babies and B.Y.O.B. (Bring Your Own Breastmilk)

Kern County RBL

Katherine Campos, M.A., C.L.E.C kcampos@capk.org

Cultivating Breastfeeding in Kern County: Coalition

- Current Chairperson of the Kern County Breastfeeding Coalition
- Coalition mainly holds meetings at the moment
- Coalition members share what their respective agencies are doing/offering
- Hospitals share information with each other!

Cultivating Breastfeeding in Kern County: CPSP

- Give breastfeeding education and support training to Comprehensive Perinatal Health Workers (CPHWs)
- Help my local Perinatal Services Coordinator move CPSP roundtables to Zoom.
- Create a comprehensive breastfeeding training curricula for the CPSP roundtables that I am able to present at.

Cultivating Breastfeeding in Kern County: Maternal Mental Health and WIC

- Screen/identify participants that may benefit from mental health services or may exhibit signs of Perinatal Mood & Anxiety Disorders.
- Create a referral list to mental health services in Kern.
- Create protocols for WIC staff to follow regarding screening and referrals.

Merced County RBL

Karen Lopez-Conde

klopez@mercedcaa.org

Cultivating Breastfeeding in Merced County: Promotion

 Used billboards and local advertising to promote breastfeeding services in Merced County

Conduced outreach with local parents by attending health fairs, doctors' offices

and local family events.

Cultivating Breastfeeding in Merced County: Mom and Baby Station

Cultivating Breastfeeding in Merced County: Breastfeeding Education

- Conduct breastfeeding education to local community HCP and community partners.
- Educate local residents and families of Merced County

Cultivating Breastfeeding in Merced County: Merced Breastfeeding Café

Two locations:

Merced- Mercy Medical Outpatient Center (Established December 2018) **Los Banos** - WIC Program Classroom (Established May 2019)

Thank you!
